Division of Health Policy Development

2006 KENTUCKY ANNUAL HOME HEALTH SERVICES REPORT

INTRODUCTION

The Division of Health Policy Development, within the Office of Health Policy, announces the release of the 2006 Kentucky Annual Home Health Services Report. This division, established on July 16, 2005, is now responsible for utilization data collection and reporting required by 902 KAR 20:008 (rev. 10-15-03) and in support of the State Health Plan 902 KAR 17:041 (rev. 7-24-06). This report shows all census data, age distribution together with total patients served, and patients served by discipline and number of visits. This report is organized by county within Area Development Districts (ADD).

This report covers the services provided from January 1, 2006 to December 31, 2006. The file received from the Office of Inspector General (OIG), Division of Licensure and Regulation contained 112 Home Health Agencies. Data in this report covers 100% of all licensed home health agencies.

Data in this report are organized in three sections. Section I shows beginning census, admissions, discharges and ending census by agency and county of service. Section II shows total patients served by age category, agency and county of service. Section III shows the number of patients served and number of visits for various disciplines (skilled nursing, home health aide, physical therapy, occupational therapy, and speech therapy) for each agency during 2006. The agencies are grouped first by ADD then by county served. **ADD totals** appear throughout the report following all county data for each ADD. **Statewide totals** appear at the end of each section. In addition, Section IV contains information and changes regarding individual agencies during the year.

The Division of Health Policy Development produces eight utilization and services reports, which can be obtained by contacting our office. In addition to the Annual Home Health Services Report, the following reports are available: Hospital Utilization and Services Report; Long-Term Care Services Report; Hospice Services Report; Magnetic Resonance Imaging Registry Report; the Ambulatory Surgical Services Report, the Megavoltage Equipment Services Report, and the Positron Emission Tomography Services Report. These reports can be downloaded from the following website: <http://chfs.ky.gov/ohp/dhppd/dataresgal.htm>

Questions or comments regarding the data contained in this report should be directed to Sheena Lewis at (502) 564-9592, ext. 3539 or e-mail: sheena.lewis@ky.gov.

This report now becomes the most recent official data on home health services utilization published by the Cabinet for Health and Family Services. For additional copies of this report, please submit a request in writing along with a check in the amount of \$10 made payable to the Kentucky State Treasurer to:

Home Health Services Report Summary

The following tables and graphs present statistics from the Kentucky Annual Home Health Services Report from 1997 to 2006. In the reports published for 1997, the data was reported in Medicaid Managed Care Partnership Regions (MCPR) rather than in Area Development Districts (ADDs). The survey data were recalculated using the ADDs so that a linear comparison could be made. A map of the ADDs is included at the end of this section.

The number of home health patients served in 2006 was 102,922. This number is well above the ten-year average (1997-2006) of 100,414 patients served. In 1997, the total number of patients served peaked at 114,462 but has varied since that time. Changes in federal regulations beginning in 1997 changed reimbursement for agencies and forced agencies to alter business practices. Closures, mergers, and sales of agencies were more prevalent. Overall, the number of patients served has decreased by 10% from 114,462 in 1997 to 102,922 in 2006.

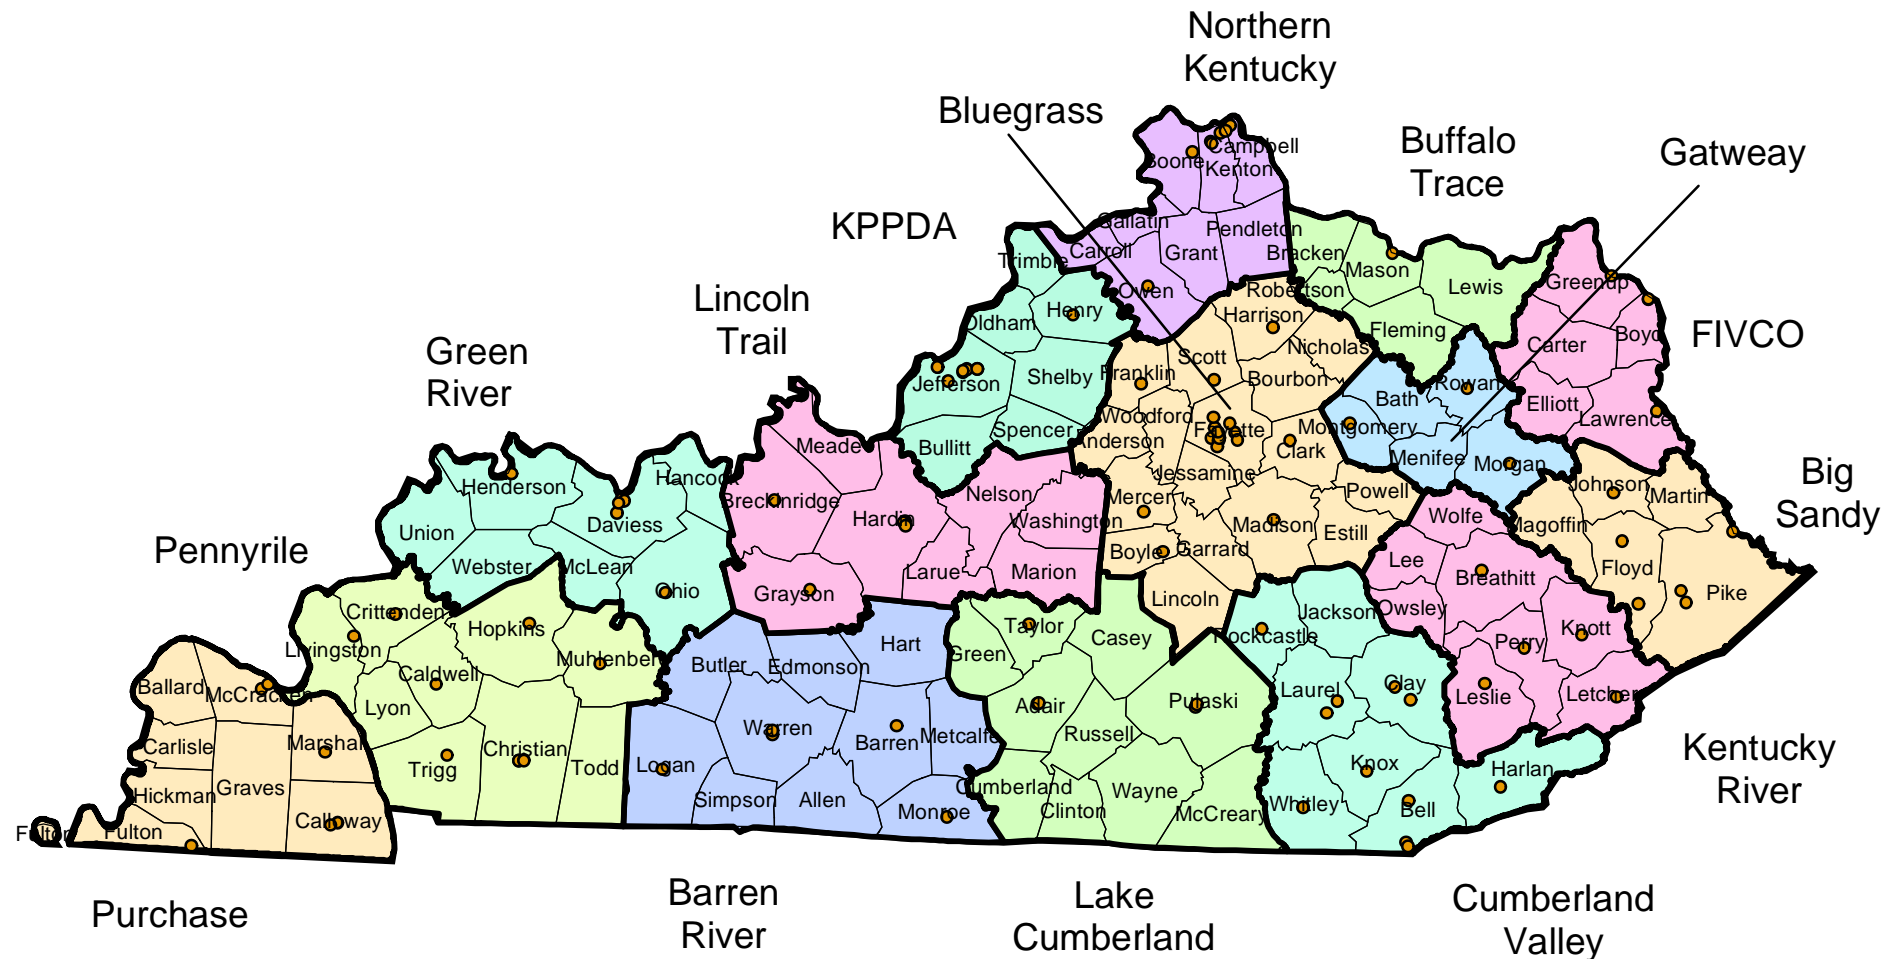

According to hospital discharge data for 2006, 54,803 patients were discharged from Kentucky hospitals to home health services. This number represents 9% of the 609,345 total patients discharged from Kentucky hospitals. Of the 54,803 patients discharged to home health agencies, 32,443 (59%) were females and 22,360 (41%) were males.

Individually, nine of the fifteen ADDs showed an increase in patients served from 2005 to 2006. Overall, patients served increased 5% from 2005 to 2006.

Data shows that the largest population of patients of home health services was from ages 75-84 consisting of 25% of the total patients in 2006. This trend has remained consistent from 1997 to 2006. Patients' age cohort 45-64 made up 23% of the patients served and 65-74 made up 19% of all patients served. Patients over 85 years of age made up 16% of the total number of patients served. These figures seem logical since it is expected that as people age; they will require more health services. However, there are less people in the over 85 age group in the total population and many of these may require higher levels of care than can be provided by home health agencies. Analysis of the age distribution among home health patients from 1997 to 2006 shows change over the past ten years.

Charts representing the data discussed in this summary are presented on the following pages.
